**RE: VOICE DIALING WITH SILENT PROMPTING FOR INITIATING
PROCESSING INTERRUPT AND ALTERNATIVE FUNCTIONS**
Your Ref. No.: 48630.000004
Our Docket No.: 981420.HW

Dear Jonathan:

In response to your letter dated September 15, 1998, we performed the patentability and infringement search which you requested. The following is a complete report of our search parameters and findings.

SUBJECT MATTER OF SEARCH

In our search, we focused on a system that allows a user to retrieve a telephone number of a person by a variety of methods. Specifically, we looked for a system that allows the user to interrupt a calling process and initiate alternative processing by indicating the other processing desired during a short delay which is prior to dialing.
